Subject: 6WQ RA UPDATE REPORT FOR WEEK OF JULY 2, 2018

These are the items reported under RA Updates to the Administrator for next week.

Denise/Brent: I did not see the one for Exxon so when item is entered let me know. 6XA likes for all entries to be approved by noon, so I've approved the ones below that showed up as RA Updates.

6WQ RA UPDATE REPORT FOR WEEK OF JULY 2, 2018

Sewage & Water Board of New Orleans, East Bank Sewage Treatment Plant, LPDES Permit No.

LA0038091, AI No. 4859 : EPA anticipates issuance of a response letter to LDEQ no later than the regulatory due date of July 5, 2018, regarding the adequacy of this preliminary draft permit (PDP) submitted to EPA by the state. The PDP for this 122 MGD publicly owned treatment works proposes to expand the wetlands assimilation project (WAP) area. A small portion of treated sanitary wastewater is discharged to the WAP to restore the flooded wetland. Soil will be brought in to restore the elevation then cypress trees will be planted.

Kay Schwab, 214-665-6635;

Illinois River Watershed Modeling Project Scenario Training: The watershed modeling (HSPEXP+) scenario training for Arkansas, Oklahoma and Tribal members of the Illinois River Watershed Project Technical Work-group is scheduled to be held the afternoon of Monday, July 9, through Wednesday morning, July 11, in West Siloam Springs, OK. The Cherokee Nation is hosting the training. Once trained, State and Tribal representatives will be able to run and analyze various scenarios based on the Illinois River Watershed Model.

Taimur Shaikh, 214-665-7181;

Illinois River Watershed Modeling Scenario Training: We have scheduled a watershed modeling (HSPEXP+) scenario training for Arkansas, Oklahoma and Tribal members of the Illinois River Watershed Project Technical Work group. The training is to be held the afternoon of Monday, July 9, through Wednesday morning, July 11, in West Siloam Springs, OK. The Cherokee Nation has agreed to host the training. Once trained, our State and Tribal colleagues will be able to run and analyze various scenarios based on the Illinois River Watershed Model.
